1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4,9 are rejected under 35 U.S.C. 103(a) as being unpatentable over 2003304697 as cited by applicant in view of Miyazawa et al .

2003-3004697 disclose control device for power steering apparatus which adopts a vector control system for applying an assist force of a motor to a steering system, see abstract. 2003-304697 lacks disclosing adding phase delay to electric angle and using corrected electric angle. Miyazawa et al discloses adding phase delay to electric angle and using corrected angle, see col 2 lines 26-46 and claims 6 and 24.

It would have been obvious to one of ordinary skill in the art to combine the steering apparatus of 2003-304697 with phase delay and electric angle of Miyazawa et al for improved control.

3. Claims 5-8, 10 are allowed.
